10. Oriental Poppy
11. Pyrethrum or Painted Daisy
12. Sweet William

CULTURAL DIRECTIONS

Spring and fall are both ideal times to plant hardy perennials. If planted in September and October they become well established before the ground freezes, with the result that the following spring they start to grow as soon as the weather moderates.

Perennials thrive well in almost any soil and if protected during the winter with a little barnyard manure and litter or straw and given an application of ground bone early in the spring and again about July 1st, they will grow profusely.
